Why Mulch?

- Mulching is one of the most important ways of vegetation management that also maintains a healthy landscape.
- Mulching helps to create a soil structure that has added nutrients from the decayed vegetation, stabilizes the topsoil which helps to prevent erosion and creates a uniform leveling of vegetation where that is desirable.
- AdMulch can help you carry out your necessary mulching requirements

Who We Are

About Us

We are a family based company with a rural and engineering background, who have researched and developed advanced vegetation management equipment and techniques.

For all Vegetation Control and Earthmoving Requirements.

- Track closures and Re-Vegetation
- Selective or Broad Acre Mulching
- Reclaiming or Creating Tracks and Firebreaks
- Precision Mulching
- Earthworks

**What do we offer that no one else does?**

We are fast – easily mulching at speeds of 4 km an hour in light conditions with our high capacity mulching units.

We are precise – we can mulch thousands of hectares, a surveyed line, or a specific tree.

The product we leave behind is a fine mulch, which returns to the soil quickly.

---

**What do you get?**

Exactly what you ask for. Each job is tailored to meet the individual needs of the task.

Specialised equipment is used to achieve the best result for each specific application.

---

Our specialties include, but are not limited to:

- Land Clearing and Mulching
- Vegetation Management
- Clean Up and Salvage Operations
- Earthmoving
- Heavy Vehicle Transport
- A Safe and Environmentally Responsible Alternative
- Cost Effective
- Demonstrated Success
- Benchmark Practices and Innovation

---

**Rural – Mining – Civil – Electrical – Government Departments**

---

**Our Products and Services.**
